

Taj Sharma

Data Analyst

sharma.tajinder01@gmail.com • 408-709-0567
linkedin.com/in/tajsharma5/ • github.com/tajsharma • DFW, TX

Technical Skills:

- **Data Analysis:** SQL (PostgreSQL, MySQL), Python (Pandas, NumPy), Advanced Excel.
- **Data Visualization & BI:** Tableau, Power BI, Matplotlib, Seaborn.
- **Data Architecture & Tools:** Relational Database Design, Data Warehousing, API Integration, Git.

Experience:

Substitute Teacher | Various Districts Feb. 2025 - Present

- Manage shifting daily objectives across different classroom environments, demonstrating high adaptability and strong on-the-fly problem-solving skills.
- Translate complex instructional materials into easily digestible formats for audiences of 30+ individuals, ensuring clear communication of daily deliverables.

Freelance Data Consultant | Classic Insurance Agency Remote • Jan. 2024 - Jan. 2025

- Designed and built scalable data pipelines using SQL and Python to automate daily data preparation workflows, significantly reducing manual data entry requirements.
- Developed a centralized relational data model to clean and structure historical client data, establishing a robust foundation for future business intelligence integrations and dashboard automation.

Data Analyst Intern | Inovum IT Solutions Barcelona, ES • Jun. 2023 – Aug. 2023

- Validated and optimized complex SQL queries for relational databases, reducing data retrieval times by 15% for enterprise-level reporting and ad-hoc analysis.
- Built custom interactive data visualizations, automating repetitive reporting processes and improving data interpretation for cross-functional business teams.

Projects:

Marketplace Sentiment Volatility Analysis Springboard Data Analytics Bootcamp • Mar. 2026

[Link to project](#)

- Conducted exploratory data analysis (EDA) on a comprehensive financial news dataset to identify market trends and data correlations.
- Utilized Python to clean missing values, normalize raw text data, and engineer temporal features to prep the dataset for deeper analysis.

ChemCorp Strategic Revenue Analysis Springboard Data Analytics Bootcamp • Feb. 2026

[Link to project](#)

- Designed a 7-slide, executive-ready Tableau story dashboard to identify revenue leakage and future growth opportunities following a 10% client churn, identifying a \$41M revenue risk across 45k customers.
- Translated raw visualizations into strategic business narratives by engineering quadrant-based investment frameworks, key takeaway callouts, and structured leadership recommendations.

EcoSim • (1st Place Winner) Autodesk Edu Hack • Sep. 2024

[Link to project](#)

- Prepared complex environmental datasets for analytics use cases, developing a Python-based logic system to identify high-heat zones.
- Delivered real-time data visualizations and heat maps, successfully translating complex energy metrics into actionable, cost-saving business insights.

Education:

University of California, Davis | Bachelor of Science in Computer Science Davis, CA • Dec. 2023

Springboard | Data Analytics Career Track (Bootcamp) Remote • Apr. 2026

MIT Schwarzman College of Computing | Data Science & Machine Learning. Remote • May 2024
